Dear Sir/Madam

ADVENT ENERGY BONAPARTE BASIN WELL INTERVENTION PROGRAM (EP386)

MEC Resources Ltd (ACN 113 900 020) (**Company**) (ASX: MMR) is pleased to advise that investee company Advent Energy Ltd (**Advent**) has engaged the services of Geoteknic Pty Ltd to provide support to deliver the proposed well intervention program within EP386 in the onshore Bonaparte Basin, Western Australia. Geoteknic Pty Ltd is an Australian reservoir engineering and technical analysis company, specialising in well test design & analysis, field well testing services, reservoir simulation and production & cased hole log analysis.

The proposed well intervention program was referred to recently in the release to the ASX dated 27 February 2017, and is subject to regulatory approval and funding. The program is intended to gather data to further assess the potential of the hydrocarbon accumulations encountered in its Waggon Creek-1 and Vienta-1 wells in EP386.

The data from the proposed well interventions is anticipated to provide new support for the commercial potential of the hydrocarbon accumulations. Subsequently, where the additional data provides a positive assessment of the resources, the Company anticipates submitting a field development plan.

Further updates will be provided as the work program progresses.

Yours faithfully
