via e-lodgement

Dear Sir/Madam

MEC Resources Ltd (ASX: MMR, ACN 113 900 020), the “**Company**”, is pleased to provide an update regarding the activities of its investee company, Advent Energy Ltd (“**Advent**”) in relation to its onshore Bonaparte Basin oil and gas assets (EP386 & RL1).

Further to the ASX announcement of 3<sup>rd</sup> March 2017 and 27<sup>th</sup> March 2017, Advent had submitted a preliminary proposed well intervention program to the designated authority for consideration. Whilst the Western Australian Department of Mines, Industry, Regulation and Safety (DMIRS) is yet to formally respond to that proposal, Advent has now commenced preliminary field operations ahead of any future well intervention works.

The principal of Geoteknic Pty Ltd continues to provide engineering support in a current preliminary well integrity assessment, which will form the basis for the proposed well intervention program.

Upon a successful well intervention program, the data collection could contribute to an enhanced resources assessment within Advent’s 100% held Bonaparte Basin assets. Quality data obtained could then support a potential field development plan for commercialisation further enhancing the value for our shareholders.

Yours faithfully

A handwritten signature in black ink, appearing to read "Goh Hock", with a horizontal line extending to the right.

Mr Goh Hock  
Chairman

**MEC Resources Ltd**
